Sailm8: Boat Racing Community App

Technologies: React Native, PHP, MySQL, Axios, AsyncStorage, RESTful APIs

- Developed a mobile app that fosters a community for boat racing enthusiasts.
- **Key Features:**
 - Group Creation & Management: Users can create groups, invite members, and manage settings like group name, image, and description
 - Real-Time Messaging: Enabled group chat and one-on-one messaging with real time updates.
 - Friend Request System: Integrated a feature allowing users to send, accept, or reject friend requests.
 - Event Invitations & Management: Users can create, manage, and send invitations for boat racing events, including date, time, location, and additional details.
 - Back-end Integration: Built and connected PHP APIs for all features including user authentication, chat functionality, friend requests, and event management.
 - Utilized: Axios for API requests, AsyncStorage for local data storage, and MySQL for database management.
